# Web App

Basics | Monitoring | Tags | Review + create

App Service Web Apps lets you quickly build, deploy, and scale enterprise-grade web, mobile, and API apps running on any platform. Meet rigorous performance, scalability, security and compliance requirements while using a fully managed platform to perform infrastructure maintenance. [Learn more](#)

## Project Details

Select a subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.

App Service Plan

App Service plan pricing tier determines the location, features, cost and compute resources associated with your app. [Learn more](#)

Windows Plan (West Europe) \* ⓘ   
[Create new](#)

Sku and size \* **Standard S1**  
100 total ACU, 1.75 GB memory  
[Change size](#)

[Review + create](#) [< Previous](#) [Next : Monitoring >](#)

## Spec Picker

  
**Dev / Test**  
For less demanding workloads

  
**Production**  
For most production workloads

  
**Isolated**  
Advanced networking and scale

### Recommended pricing tiers

**F1** Shared infrastructure  
1 GB memory  
60 minutes/day compute  
Free

**D1** Shared infrastructure  
1 GB memory  
240 minutes/day compute  
82.91 SEK/Month (Estimated)

**B1** 100 total ACU  
1.75 GB memory  
A-Series compute equivalent  
478.35 SEK/Month (Estimated)

[See additional options](#)

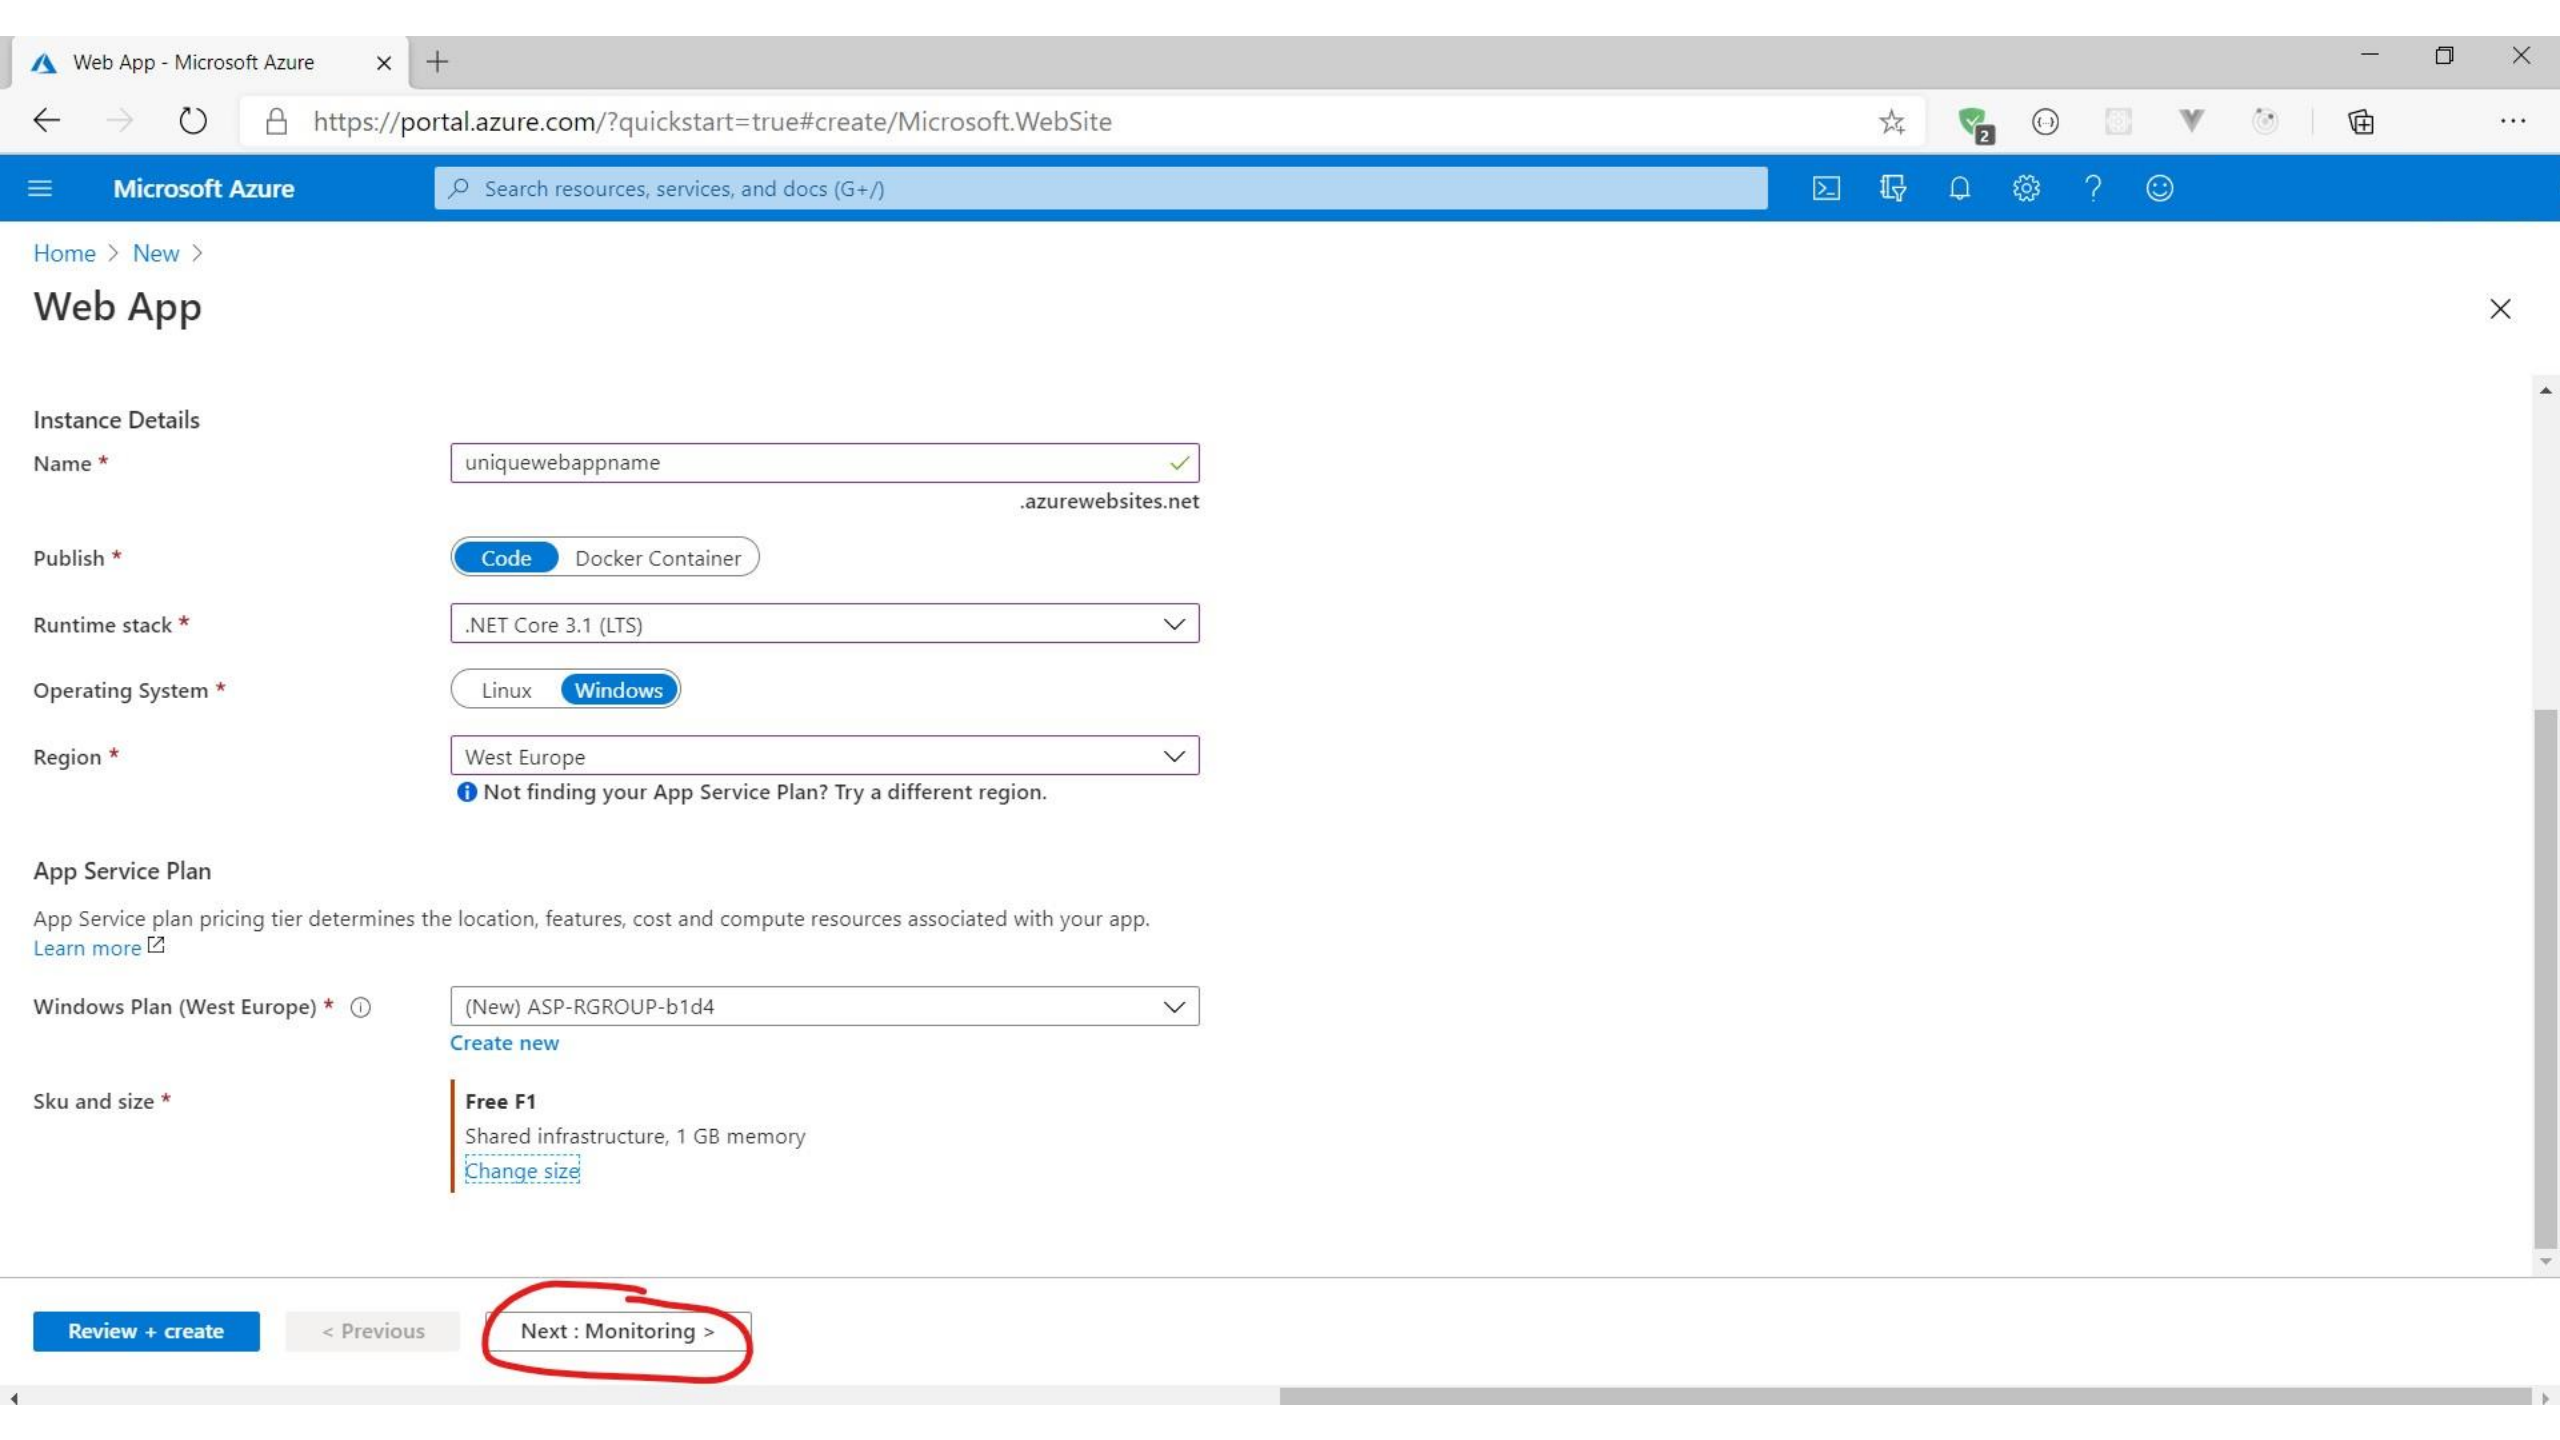

### Included hardware

Every instance of your App Service plan will include the following hardware configuration:

 **Memory**  
Memory available to run applications deployed and running in the App Service plan.

 **Storage**  
1 GB disk storage shared by all apps deployed in the App Service plan.

**Diagnose and solve problems**  
Our self-service diagnostic and troubleshooting experience helps you identify and resolve issues with your web app.

**Application Insights**  
Application Insights helps you detect and diagnose quality issues in your apps, and helps you understand what your users actually do with it.

**App Service Advisor**  
App Service Advisor provides insights for improving app experience on the App Service platform. Recommendations are sorted by freshness, priority and impact to your app.

# Visual Studio 2019

## Open recent

As you use Visual Studio, any projects, folders, or files that you open will show up here for quick access

You can pin anything that you open frequently so that it's always at the top of the list.

## Get started

### Clone or check out code

Get code from an online repository like GitHub or Azure DevOps

### Open a project or solution

Open a local Visual Studio project or .sln file

### Open a local folder

Navigate and edit code within any folder

### Create a new project

Choose a project template with code scaffolding to get started

[Continue without code →](#)
